

**AUDIO COMMANDER**

Download the Latest in Software for Enhancing your Audio Applications and Microphone Performance at:

**AUDIO COMMANDER.COM**

**AudioCommander™**

- Superior audio interface for PC multimedia applications
- Access to noise cancellation features for microphone enhancement
- Audio wizard sets microphone levels to optimize PC audio for speech-enabled applications: Internet telephony, videoconferencing, speech recognition and other voice-driven applications

**PureAudio™ Software**

PureAudio™ is a noise canceling algorithm that enhances speech-centric applications by sampling an ambient noise environment and subtracting the noise source around the desired speech signals, delivering *pure* audio signal.

- Reduces noise for speech recognition, voice over Internet protocol, Internet voice chat and videoconferencing
- Improves intelligibility of audio communications

**Far-Field Microphone Array Products**

- **USB Microphone Array™**  
*Far-Field USB Microphone Optimized for Intel's Pentium®*
- **Sound Card Microphone Array**  
*Line-in Microphone Array for Sound Card Interface*
- **DA-400 Desktop Array™**  
*The Only Far-Field Microphone Added to IBM's List of Approved Microphones for Use with its ViaVoice® Millennium Continuous Dictation Software*

Andrea's DA-400 gets "★★★★★" says PC Magazine
